

MONOCLONAL ANTIBODIES

and Fc fusion proteins for therapeutic use

DISTRIBUTION OF INTERNATIONAL NONPROPRIETARY NAMES BY INDICATION

SOLID TUMORS		RHUMATOLOGY		PNEUMOLOGY	
Lung cancer	bevacizumab	Rheumatoid arthritis	etanercept	Allergic asthma	omalizumab
	nivolumab		infliximab	Severe eosinophilic asthma	mepolizumab
	necitumumab		adalimumab		reslizumab
	atezolizumab		rituximab		
	bevacizumab		abatacept		
	cetuximab		tocilizumab		
	panitumumab		certolizumab pegol		
	afiblercept		golimumab		
	atezolizumab		etanercept		
	trastuzumab		adalimumab		
Colorectal cancer	bevacizumab		infliximab		
	cetuximab		golimumab		
	panitumumab		ustekinumab		
	afiblercept		certolizumab pegol		
	atezolizumab		secukinumab		
	trastuzumab		infliximab		
	bevacizumab		etanercept		
	pertuzumab		adalimumab		
	trastuzumab entansine		golimumab		
	trastuzumab		certolizumab pegol		
Bladder cancer	ramucirumab		secukinumab		
	cetuximab		infliximab		
	bevacizumab		etanercept		
	bevacizumab		adalimumab		
	bevacizumab		golimumab		
	bevacizumab		certolizumab pegol		
	bevacizumab		secukinumab		
	bevacizumab		etanercept		
	bevacizumab		adalimumab		
	nivolumab		golimumab		
Breast cancer	ipilimumab		certolizumab pegol		
	nivolumab		secukinumab		
	pembrolizumab		etanercept		
	dinutuximab		adalimumab		
	catumaxomab		afiblercept		
	denosumab		tocilizumab		
	olaratumab		canakinumab		
	avelumab		canakinumab		
			denosumab		
HAEMATOLOGIC DISEASES		GASTROENTEROLOGY		HAEMOSTASIS AND THROMBOSIS	
Hodgkin's lymphoma	brentuximab vedotin	Crohn's disease	infliximab	Haemophilia A	efmoroctocog α
	nivolumab		adalimumab	Haemophilia B	eftrenonacog α
	rituximab		vedolizumab	Reversal of dabigatran	idarucizumab
	ibritumomab tiuxetan		ustekinumab	Idiopathic thrombocytopenic	romiplostim
	brentuximab vedotin		infliximab	purpura	
	inotuzumab ozogamicine		adalimumab	Unstable angina	abciximab
	obinutuzumab		golimumab	Percutaneous coronary	
	rituximab		certolizumab pegol	intervention	
	alemtuzumab		secukinumab		
	ofatumumab		etanercept		
Non-Hodgkin's lymphomas	obinutuzumab		adalimumab		
	rituximab		afiblercept		
	ibritumomab tiuxetan		tocilizumab		
	brentuximab vedotin		canakinumab		
	inotuzumab ozogamicine		canakinumab		
	obinutuzumab		denosumab		
	rituximab				
	alemtuzumab				
	ofatumumab				
	obinutuzumab				
Chronic lymphocytic leukaemia	blinatumomab	Ulcerative colitis	infliximab	Haemophilia A	efmoroctocog α
	inotuzumab ozogamicine		adalimumab	Haemophilia B	eftrenonacog α
	gemtuzumab ozogamicine		vedolizumab	Reversal of dabigatran	idarucizumab
	daratumumab		ustekinumab	Idiopathic thrombocytopenic	romiplostim
	elotuzumab		infliximab	purpura	
	eculizumab		adalimumab	Unstable angina	abciximab
			golimumab	Percutaneous coronary	
			vedolizumab	intervention	
IMMUNOLOGY		NEUROLOGY		ENDOCRINOLOGY AND METABOLISM	
Systemic lupus erythematosus	belimumab	Multiple sclerosis	natalizumab	Type 2 diabetes	dulaglutide
	siltuximab		alemtuzumab		
Castleman's disease			daclizumab		
Dermatology		INFECTION DISEASES		GENETIC DISEASES	
Paroxysmal nocturnal haemoglobinuria	Psoriasis		natalizumab	Prevention of respiratory	Cryopyrinopathies
			alemtuzumab	syncytial virus infection	Atypical hemolytic
			daclizumab	Anthrax infection	uremic syndrome
				Prevention of	Familial hypercholesterolemias
				<i>Clostridium difficile</i> infections	
IMMUNOLOGY		INFECTIOUS DISEASES		GENETIC DISEASES	
Systemic lupus erythematosus	belimumab	Chronic spontaneous urticaria	natalizumab	palivizumab	canakinumab
	siltuximab		alemtuzumab	raxibacumab	eculizumab
Castleman's disease			daclizumab	obiltoxaximab	evolocumab
				bezlotoxumab	alirocumab
